Curriculum Delivery

The college believes in student centered learning and the use of constructivist paradigms. We ensure that the courses are implemented with sufficient student participation and that the learners get enough opportunities to do their own research to build on the knowledge obtained. Apart from the lecture method the teachers coordinate group discussions and seminar presentations. The assignments given to the students are evaluated regularly and feedbacks are given in a timely manner. The students are encouraged to attend seminars and events conducted by various departments both in and out of the college. The syllabus is completed as per schedule and enough time for revision is given for the students.

ICT enabled classrooms make the learning process interesting and enlightening. The students are encouraged to create their own presentations and engage in discussions with their peer groups.

The internal marks are tabulated and the students are informed about their progress for each course in the respective semester.
